For more than 100 years, CENTRIA has been a leader in the art and science of producing color coated metal walls and roofs that excel in both beauty and function. Our expansive range of high-quality coating systems come to life through a full palette of colors, substrates and surface textures to meet even the most demanding environmental conditions. Allow us to put our advanced color matching technology to work for you for even the most unique and unusual colors.

See for yourself how CENTRIA's dynamic range of colors can enhance your next project.

We are…Distinctively CENTRIA.

**COATING SYSTEMS**

**Fluorofinish** (PVDF) is a durable polyvinylidene fluoride coating system containing 70% Kynar 500®/Hylar 5000® resins. Fluorofinish is a good choice for architectural applications.

**Duragard** coatings are premium, high build architectural finishes that provide premium performance in color retention and fade resistance. Added protection is obtained with our Duragard Plus coating that includes an additional .8 mil PVDF clear top coat.

---

Please note all finish thicknesses shown are nominal.

* Polyvinylidene Fluoride (PVDF) coat contains 70% Kynar 500 or Hylar 5000 resin

Kynar 500 is a registered trademark of Atofina Chemicals, Inc.

Hylar 5000 is a registered trademark of Solvay Solex, Inc.
**VERSACOR ULTRA**

**Versacor® Ultra** coatings provide a high build, 3 mil thick, Versacor Barrier Coat Primer over the metal substrate and several topcoat finish combinations to achieve superior performance against corrosion and abrasion.

**Versacor Ultra PF** is an excellent coating for corrosive architectural applications. This coating consists of 3 mil thick Versacor Barrier Coat Primer and .8 mil thick PVDF top coat.

**Versacor Ultra TF and HF** combine a 3 mil thick Versacor Barrier Coat with a Urethane top coat. This coating merges the superior corrosion resistance of the Versacor Barrier Coat with the durability of a Urethane finish. The Urethane top coat ranges from 1.5 mil thick on Versacor Ultra TF to 3 mil thick on Versacor Ultra HF, making it CENTRIA’s highest performing corrosion resistant coating.

---

**What is Reverse Side Coating Protection?**

On CENTRIA Profile Series Panels with a Versacor Ultra coating system, an optional Versacor Ultra Barrier Coat may be applied to the interior of the metal substrate. A wash coat, Urethane top coat (Arctic Ice color standard) or a Polyester top coat (Arctic Ice color standard) are applied over the barrier coat. This additional coating protects the metal against corrosion from the interior and at lap conditions, providing superior protection.

---

**SERIES COLORS**

The Prismatic Series is available in a wide range of colors and finish systems including:

<table>
<thead>
<tr>
<th>179 Regal White*</th>
<th>996 Crushed Ice*</th>
<th>993 Off-White†</th>
<th>995 Cambridge White*</th>

LEED, the Leadership in Energy and Environmental Design Green Building Rating System, provides standards for environmentally sustainable construction. Contact CENTRIA for specific SRI Values.
Sundance Mica is a 2-coat system that provides a pearlescent appearance. Sundance Mica is a high performance PVDF finish that is an excellent, cost effective alternative to metallic finish systems requiring clear coats.

Sundance AM is a polyvinylidene fluoride (PVDF) 3-coat system that incorporates metal flakes in the color coat. A clear top coat protects the metal flakes and results in an outstanding metallic effect.

Cost of CENTRIA coatings may vary depending on specific color and finish selection.

Colors shown in this brochure are for preliminary selection only. Printed colors can vary from actual painted metal samples before final selection.
**CUSTOM COLOR MATCHING**

CENTRIA offers the latest color matching technology, allowing us to provide fast turnaround on even the most unique and unusual colors. Our partnership with Valspar, one of the world’s leading coatings manufacturers, allows us to ensure precision and quality on all color matching projects.

Consult CENTRIA for reflectance and emittance values for specific cool roofing colors.

Below are several examples of bright and vibrant custom matched colors.

**DURACAST® TEXTURED FINISH SYSTEM**

DuraCast® is a textured coating system available for Formawall® Dimension Series®, Formawall® Graphix Series® and Versawall® panels. This coating consists of a permanent, non-absorbent acrylic and silica coating applied over a special polyester base coat.

- **Off-White**
- **Limestone**
- **Lee Ivory**
- **Surrey Beige**
- **Light Seawolf**
- **Dove Gray**
- **Light Gray**
- **Slate Gray**

* Subject to minimum quantity requirements

**INTERIOR COLOR**

Unless specified otherwise, CENTRIA will provide a standard backer coat on the backside of single skin panels. Color may vary.

Polyester Arctic Ice is the standard finish offering for the interior surfaces of foam panels. Other finishes available upon request.

- 5913 Polyester Arctic Ice
  - Interior Use Only
